PROFESSIONAL EXPERIENCE

Graduate Research Assistant

Center for Translational Research in Neuroimaging and Data Science, Georgia Institute of Technology

Aug 2021 - Present

Atlanta, GA, US

- Developing a multidataset independent subspace analysis framework to identify linear and nonlinear latent sources from multimodal neuroimaging data.
- Developing a functional network connectivity interpolation method to estimate continuous alternations between controls and patients with mental disorders (schizophrenia, autism, depression) using a variational autoencoder.
- Evaluated the impact of preprocessing pipeline selection on the downstream performance of a supervised learning model and developed pipeline-invariant representation learning methodologies to improve prediction consistency.

Assistant Research Engineer

Computational Neuroimaging Lab, Child Mind Institute

Jun 2019 - Aug 2021

New York, NY, US

- Developed the software Configurable Pipeline for the Analysis of Connectomes (C-PAC) for magnetic resonance imaging (MRI) processing and analysis; implemented fMRIPrep-options, XCP-options, ABCD-options, CCS-options, longitudinal, surface, non-human primate, and rodent pipelines in C-PAC.
- Developed a U-Net model and a transfer learning paradigm for brain extraction and tissue segmentation on non-human primate structural MRI data.
- Improved brain-behavior variance explained using shared response model on Human Connectome Project data.
- Analyzed spatial temporal dynamics and inter-subject correlation on naturalistic neuroimaging data.

Graduate Research Assistant

New York State Psychiatric Institute

Aug 2018 - May 2019

New York, NY, US

- Designed a motor imagery task interface for electroencephalogram (EEG) data recordings using PsychoPy.
- Developed a cascade ResNet-LSTM deep learning model to classify motor imagery EEG signals.

Graduate Research Assistant

Hood Visual Science Lab, Columbia University

Jun 2018 - May 2019

New York, NY, US

- Designed convolutional neural networks (CNN) to identify glaucoma with wide-field optical coherence tomography (OCT) scans; applied grad-cam and attention map to explain CNN features; implemented multiple strategies, such as data augmentation and multimodal input, to enhance the model generalizability.
- Built MATLAB-based APIs for qualitative and quantitative measures of glaucoma progression in both early and advanced glaucoma datasets using wide-field OCT scans.

Graduate Research Assistant

Laboratory for Intelligent Imaging and Neural Computing, Columbia University

Feb 2018 - May 2019

New York, NY, US

- Collected eye tracking data in three conditions when subjects watch lecture videos with soundtrack, slides and the speaker, to assess determinant factors in online courses.
- Analyzed eye tracking data of video study using the structural equation model to illuminate the relationship between the amount of information loading and the mechanism of cognitive regulation.

TEACHING APPOINTMENTS

Graduate Teaching Assistant

CIT 595 Computer Systems Programming | University of Pennsylvania

Fall 2020, Spring 2021

- Developed an autograder, held weekly office hours, answered questions in discussion forum, graded exams.
